

VIEW over the harbour ...

This duplex apartment, an example of interior design, gives you a breath-taking view over the coast, the harbour and the North Sea. Its exceptional situation and privileged location lift the optimum use of the spaces to an even higher level. The project developer Groep Versluys asked Obumex to create a place that attests to their close cooperation. This apartment, bathing in refined elegance, is the model « par excellence » of an interior design creation, at the highest level of realization. Delicate materials and a spotless finish, made-to-measure designs, quality constantly in search of perfection, ... enter the Obumex universe.

For this custom-made kitchen, we have used exceptional materials selected by the chief interior design architect Xavier Gadeyne and the manager Geert Ostyn: the bronze tap is an Obumex creation and the kitchen credence is realized in Ceppo, an

Italian natural stone. A composite material creates an immaculate work surface and the marsh oak cupboards are equipped with magnificent bronze handles.

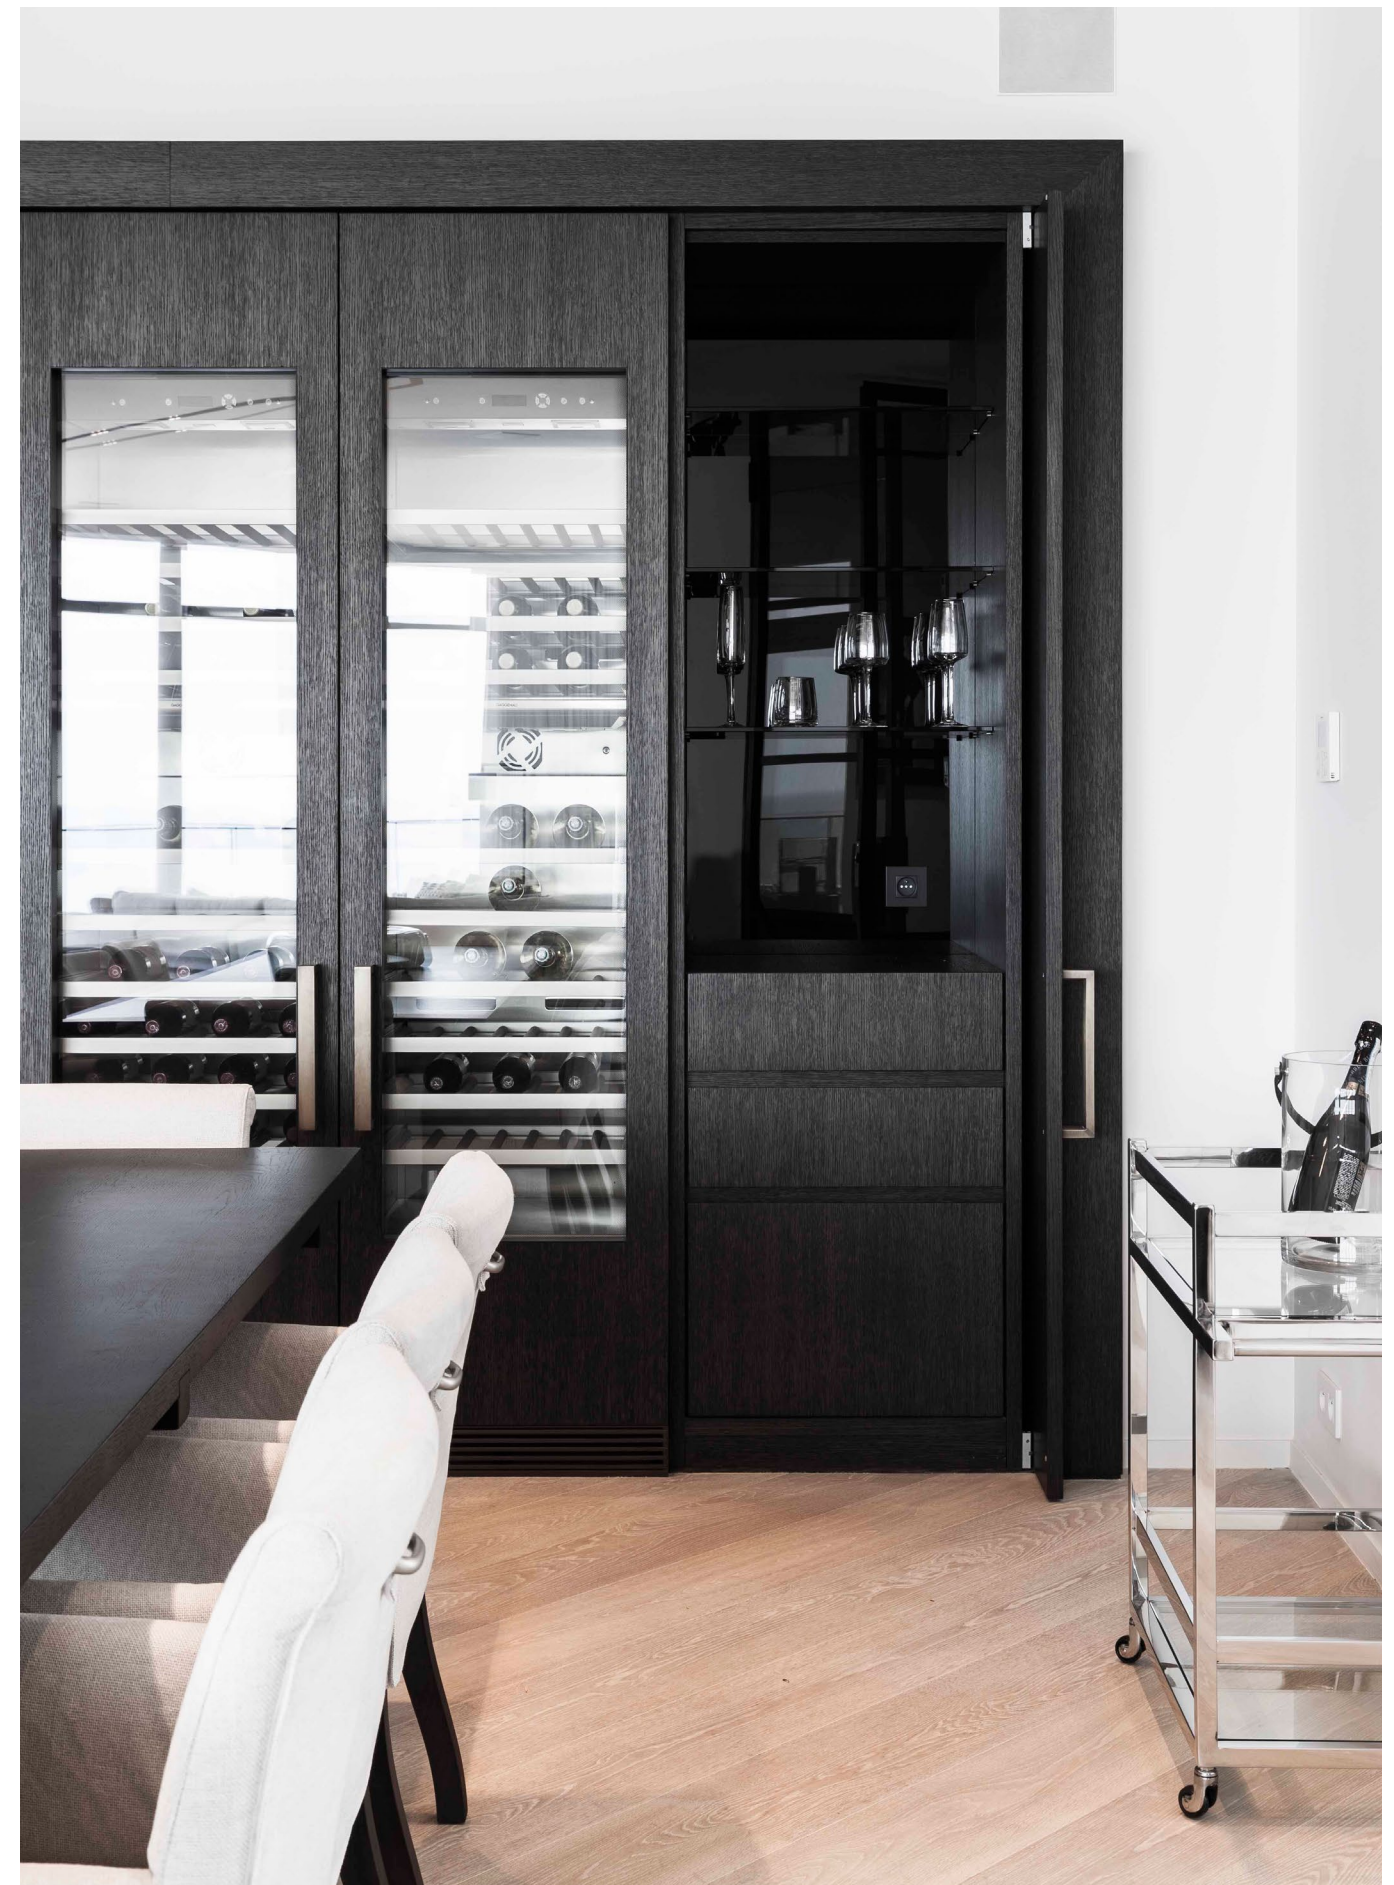

Our philosophy, that's haute couture ...

Our creations reflect the wishes of our customers. At Obumex, there are no limits, we make your dreams come true, far beyond any standard. We start from a blank page to create a special and personal project. Each element is drafted to the smallest detail. The time and patience we spend on each project

to guarantee that no detail escapes our attention, makes the difference... Our craft is anchored in the XXIst century. In-between modernity and tradition, « high touch » encounters « high-tech ».

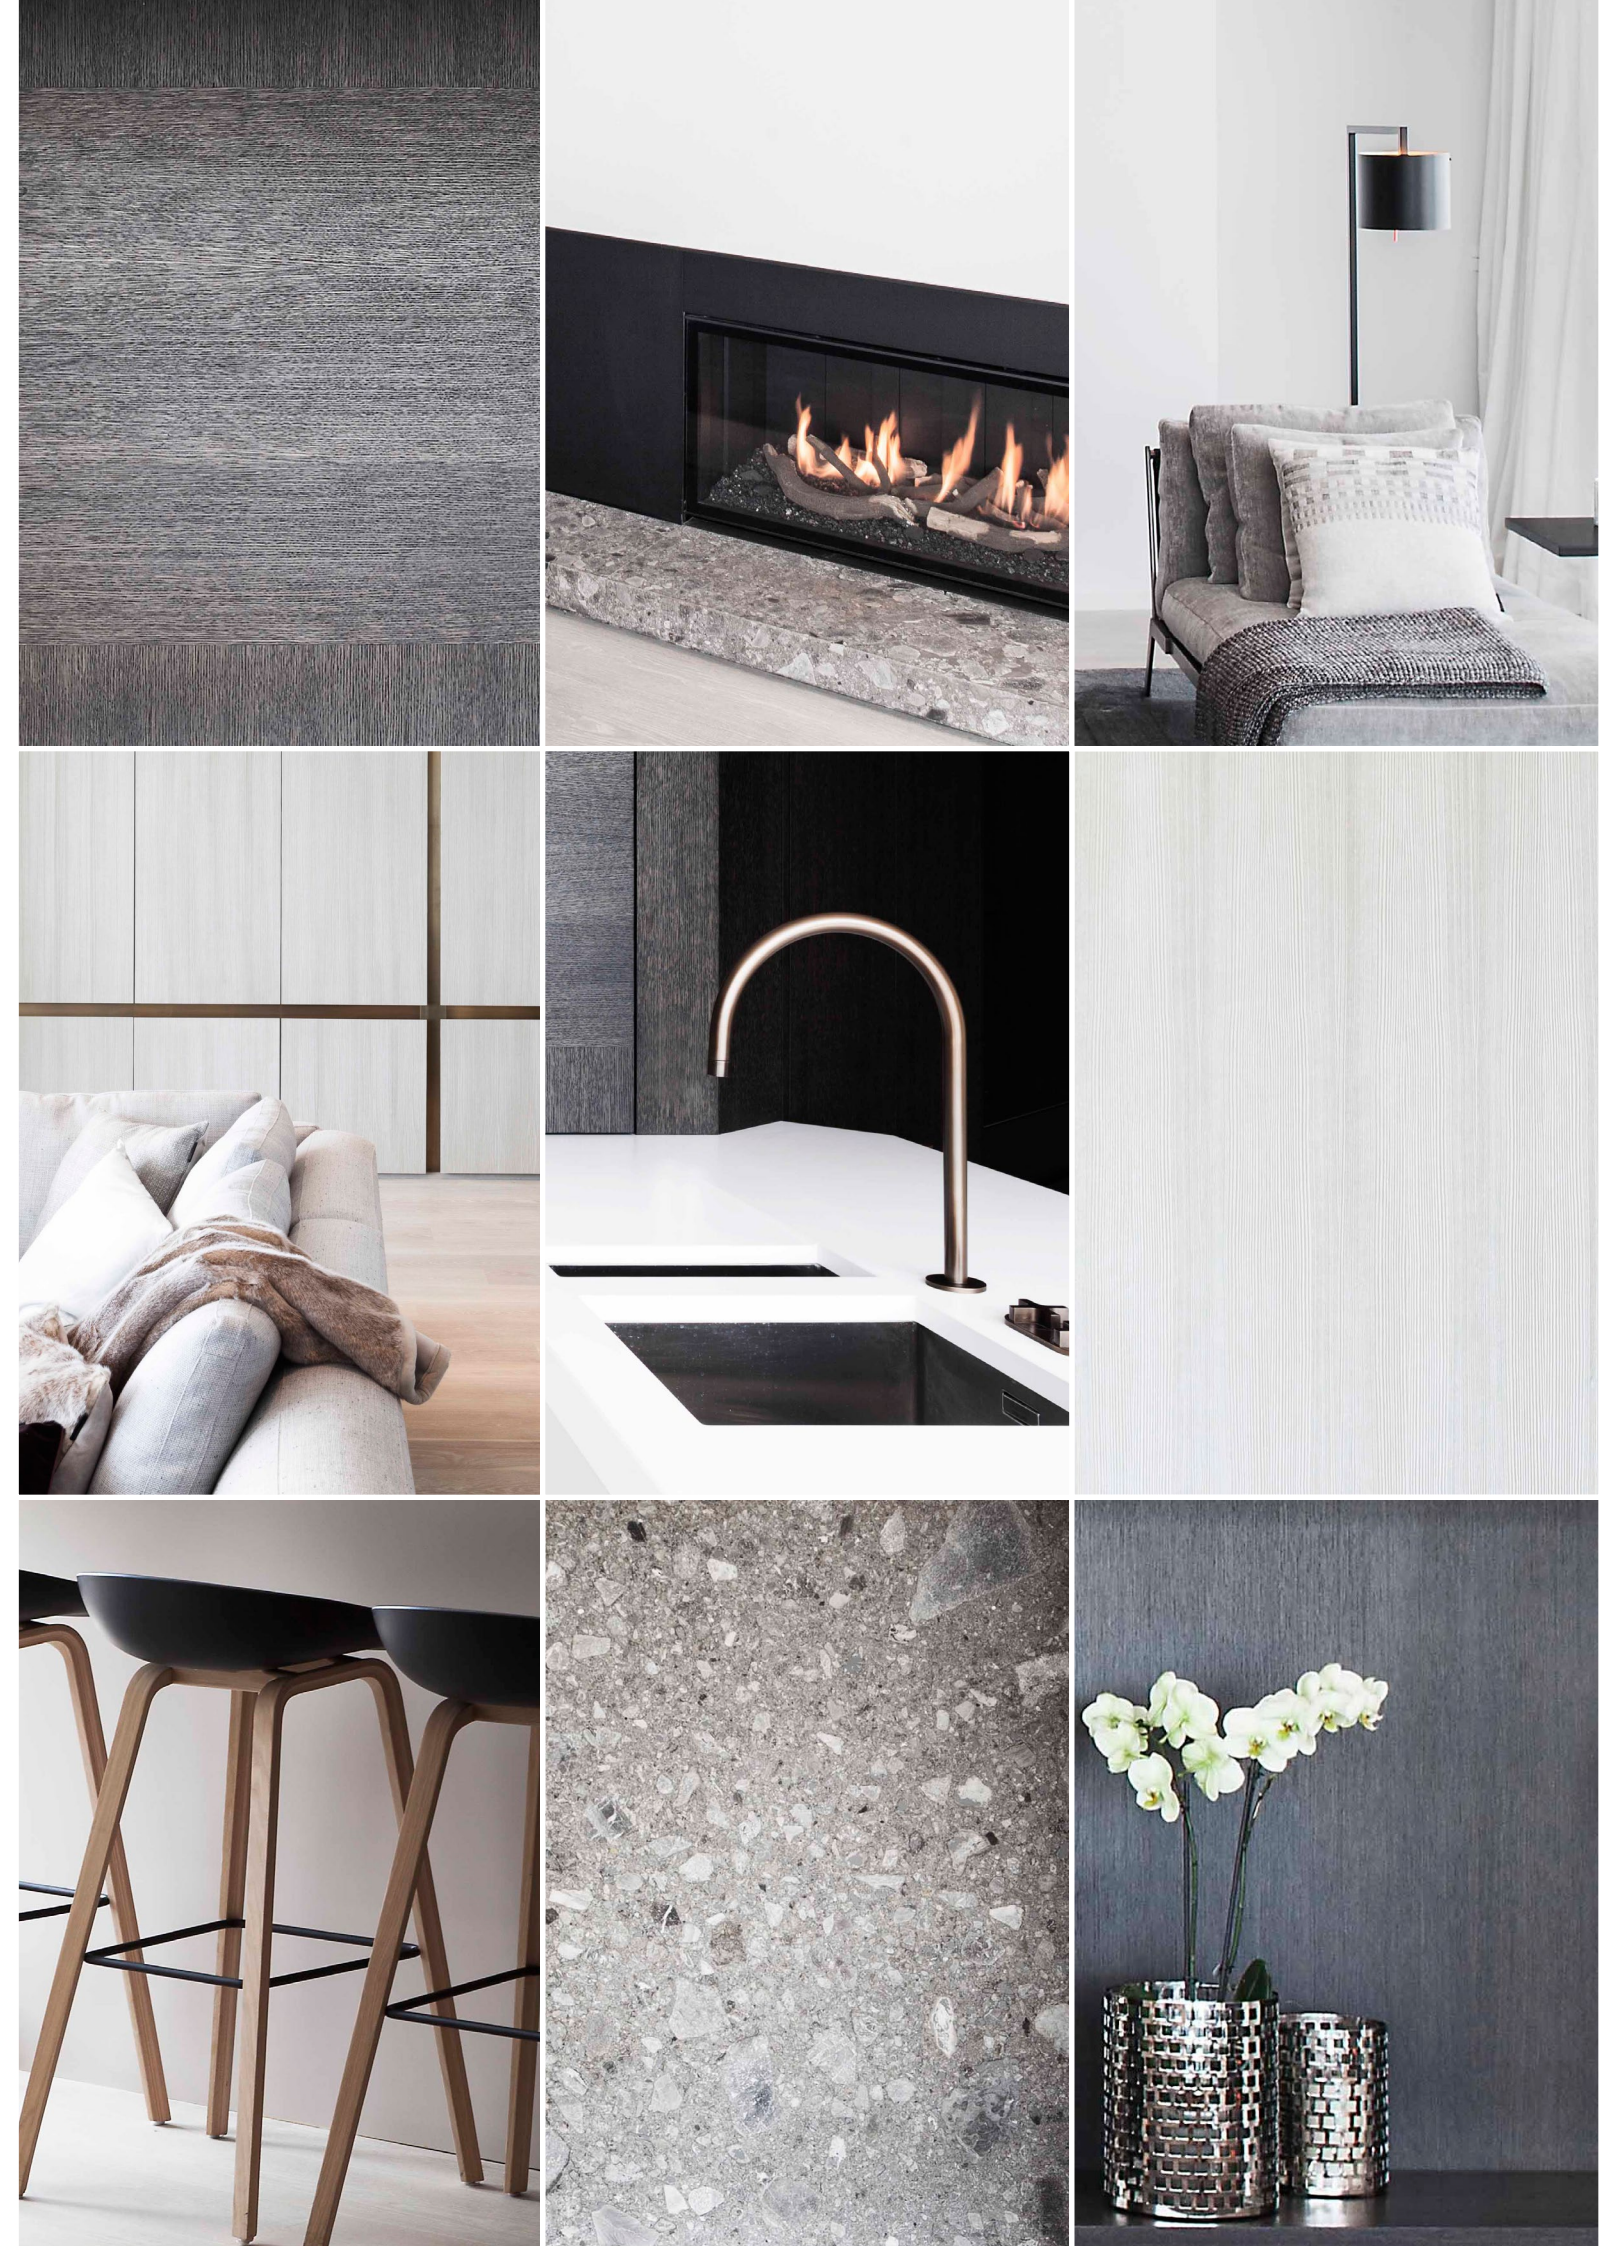

“The Obumex designs address demanding customers who refuse standardized products and who wish to personalize their interior, with some guidance and without surcharging the developer. When Obumex intervenes in a real estate project, as a partner, it can optimize the contents, the arrangement of the space and the finishing, in order to optimize the product for the sale.”

Bart Versluys (Groep Versluys)

Obumex takes care of the entire coordination of the site. We have a staff of 120 enthusiastic professionals and a perfect knowledge of the materials. Moreover,

our competence does not only guarantee an impeccable finish of each and every detail, but also an excellent follow-up of the works.
